

SOLAR PROJECT DEVELOPER ITALY (M/W)

Sunshine Power is an international Photo Voltaic Systems Integrator with locations Germany and Italy. Our business areas are acquisition, development, operations and financing of solar rooftops and parks.

For our German office, based in Munich, we are looking for a

Solar Project Developer

Your tasks:

- Acquiring PV projects. Building up a project pipeline including securing new projects
- Leading authorisation projects for national and international PV projects
- Assessing the 4 relevant pillars of PV projects: project / object, grid connection, authorisation process, financing
- Negotiating development, purchase, lease and share participation contracts
- Negotiating with public authorities and utility companies
- Assessing cost and feasibility of projects
- Visiting and assessing industrial fields and rooftops to determine technical and economic feasibility

Your profile:

- Master degree in technical field
- Experience in project acquisition and development
- Broad technical know-how in PV
- Strong English skills both oral and in writing
- Optimistic attitude also in difficult situations
- High social competence and team player capabilities
- Structured, analytical and strategic thinking
- High degree of initiative and follow through

We offer a diverse and interesting job with strong development potential in a fast growing and innovative solar company.

If you are interested please send your application, including your preferred starting date and your envisioned compensation to
